

ETV vs. Shunt Revision Study: surgery & d/c

Hospital number 1

Admission

Initial
Radiology

Surgery &
discharge

Follow-up

Surgery

Date of surgery

- Findings
- Shunt infected (EVD intervening)
 - Proximal block
 - Distal block
 - Valve blocked
 - Overdrainage
 - Other...

Procedure

Shunt revision

- Replacement of whole shunt
- Replacement of proximal catheter
- Replacement of distal catheter
- Replacement of valve
- Addition of ASD
- Addition of reservoir
- Other...

ETV

- ETV alone
- ETV and EVD
- ETV with VAD
- ETV with lumbar drain
- Scope passed through stoma
- secondary membrane
- Other...

Complications

- MRI prior to discharge
(in case of ETV)
- not done
 - flow through stoma
 - inconclusive
 - no flow through stoma

Date of discharge
